

CDI's M&T Company specializes in military aviation support equipment design, electronic manufacturing, acquisition and life-cycle support services. M&T works extensively in the areas of aircraft launch / recovery systems, and avionics support equipment with core competencies in engineering, logistics, technical publications, program management, and electronic manufacturing.

Reverse Engineering of Obsolete Parts

Services Include:

- Program Management
- Engineering
- Analytical Mechanics
- Simulation Studies
- Contractor Engineering Services
- Logistics
- Technical Publications
- Information Technology
- Electronic Manufacturing
- Aviation Support Equipment Design and Manufacturing
- Independent Verification/Validation (IV&V) of Avionics Support Equipment

Engineering Solutions Government Services

Enhanced graphics ship

CDI-Government Services provides Ship Design, Naval Engineering, Aviation Engineering, and Professional Services to the Department of Defense, the Department of Homeland Security, and the Defense Industry at-large. CDI-Government Services primarily supports the U.S. Navy, the U.S. Coast Guard, and prime contractors who have long-term, high value project commitments to government agencies. Headquartered in Washington DC and with 13 offices located nationwide, CDI-Government Services has a staff of more than 800 engineers, designers, logisticians, and technicians, and more than 35 years experience in the Government Sector.

CDI-Government Services is comprised of two Companies: CDI Marine Company - provides Naval Architecture, Marine Engineering and Ship Design and the M&T Company - provides Military Aviation Support. In short, CDI-Government Services can engineer solutions, manage solutions and projects, and source talent - offering customers project specific expertise or a cost effective, single source provider to fulfill their multiple needs.

CDI offers professional consulting and staffing support services in support of engineering, IT and program management requirements.

Ship's Current Readiness & Recommended Repairs

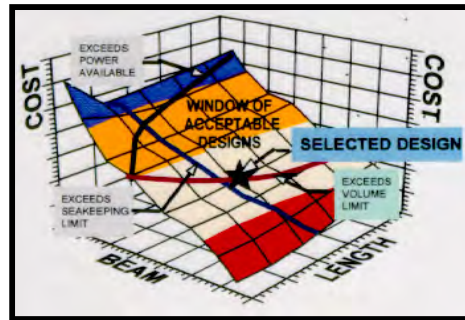

Services include:

- Ship Modernization and Maintenance
- Material and System Assessment and Readiness
- Technology and Process Insertion
- Software Development
- Data Management
- Strategic Planning and Process Development
- Professional Consulting
- Professional Recruitment Outsourcing
- Managed Services
- Staffing Services

NAVAL ARCHITECTURE

CDI offers a comprehensive range of conventional and advanced naval architecture and marine engineering services, innovative early-stage design, systems engineering and research and design.

Design Synthesis

Services Include:

- Ship Design Concept Exploration
- Cost-Effectiveness Design Trade-Off Studies
- Preliminary Design
- High-Speed Ships & Craft Design
- Hovercraft Design
- Seakeeping, Stability & Maneuvering Analysis
- Regulatory Body Compliance
- Construction Oversight
- Test & Trials Planning and Support

NAVAL ENGINEERING

CDI offers all aspects of ship design, from Contract through detail design and full lifecycle support services.

New Construction Design and Engineering

Services Include:

- Design and Engineering at our facilities or the client's facility.
- Ship Alteration and Modernization Design
- Ship Conversion, Mission Systems Support, Systems Prototyping.
- Numerical Control (NC) lofting and hull fairing.
- Construction Oversight and Support.
- Inclining test, intact and damage stability books, loading conditions
- Pipe stress analysis, Electrical Load Analysis, and Structural Shock Analysis
- Material Condition Assessment

Ship Design, Alteration, and Lifecycle Support

ADVANCED SHIP TECHNOLOGY

CDI conducts leading edge research in advanced ship technology. Current research areas include waterjets, Americas Cup sail and mast design, gas flow in hospital rooms, and advanced skirt design.

Design and Testing of High Speed Planing Hull.

Services Include:

- Marine Waterjet Design
- Conceptual Fluid Dynamics (CFD)
- Structural Finite Element Analysis (FEA)
- Model Design and Testing in our own shop or at major test facilities
- Prototype Chem / Bio Detection and Remediation Systems

Chem / Bio Detection and Remediation System

ALTERATION INSTALLATION

CDI offers Turn-key support for boat and

Full Service Industrial Shop

ship maintenance, repair and alteration.

Services include:

- Engine Repair and Replacement
- Hull Structure Repair and Replacement
- Systems and Equipment Installation, Repairs, and Testing
- Electrical, Mechanical and Electronic Systems Installation, Troubleshooting and Repair.
- HVAC Systems and Equipment
- Piping Systems and Equipment
- Deck Machinery Repair and Replacement
